

Fall Arrester POWERTEX SKN Band P0043 on flexible anchorage line

Product information

POWERTEX

Guided type fall arrester on a flexible anchorage line. The gliding along the coreshedded rope absorbs the energy. As soon as the unit tilts, the brake blocks close around the rope and SKN Band SK 11 holds the secured person within an extremely short reaction time and without much noise. This appreciably reduces the initial shock from the fall and the worker feels safe.

Max. number of persons: 1.

Handwashing: Up to max. 40°C.

Marking: According to standard, Supplier symbol, product id, size/length, production date, reference no, serial no and CE.

Temperature range: -35°C to +45°C.

Standard: EN 353-2
